

WHAT IS CLAIMED IS:

1. A device for cleaning a carpet, comprising:  
a cleaning product comprising an active ingredient;  
an aerosol dispenser, said aerosol dispenser comprising a reservoir for containing said cleaning product and a valve member for delivering said cleaning product onto said carpet; and  
a body comprising a housing for receiving said aerosol dispenser.
2. The device of claim 1 wherein said aerosol dispenser is removable from said housing.
3. A method of cleaning a carpet comprising:  
providing a device for cleaning a carpet comprising:  
a cleaning product comprising an active ingredient;  
an aerosol dispenser, said aerosol dispenser comprising a reservoir for containing said cleaning product and a valve member for delivering said cleaning product onto said carpet; and  
a body comprising a housing for receiving said aerosol dispenser; and  
dispensing said cleaning product onto said carpet.
